

SEEABLE HOARDINGS

UI/UX Requirements — Premium Billboard-Centric Landing Page

1. Core Design Concept

The billboard is the hero. The entire landing page should be designed around the idea of a real SEEABLE HOARDINGS billboard existing in the physical world. The website should make the visitor feel as though they are moving through an outdoor advertising environment rather than browsing a conventional corporate website.

Primary visual direction: **real billboard + cinematic presentation + smooth UI/UX + minimal typography + immersive scrolling.**

2. Overall Experience

- Premium, modern and visually memorable.
- Smooth scrolling and polished transitions throughout.
- Large-scale imagery rather than small repetitive cards.
- Minimal copy with strong typography.
- The billboard remains the visual identity of the experience.
- Animations should feel intentional and fluid, never distracting.
- The website should feel like a premium outdoor advertising brand, not a SaaS product or generic corporate template.

3. Landing Page Sections

01 — HERO / BILLBOARD

- Full-screen or near-full-screen billboard scene.
- Realistic SEEABLE HOARDINGS billboard as the primary visual.
- SEEABLE HOARDINGS branding visible on the billboard.
- Minimal navigation.
- Short headline/tagline.
- Primary CTA such as Explore / Discover / Enquire.
- Slow camera movement, parallax or subtle billboard animation.

02 — ABOUT SEEABLE

- Transition naturally from the billboard scene into the company story.
- Headline direction: 'WE MAKE BRANDS SEEN.'
- Short 2–4 line company introduction.
- Use a large environmental image or billboard visual.
- Avoid long paragraphs.

03 — WHAT WE DO

- Present services through large typography and visual transitions.

- HOARDINGS
- BILLBOARDS
- STRATEGIC LOCATIONS
- BRAND VISIBILITY
- Use motion or image transitions instead of standard service-card grids.

04 — OUR REACH / LOCATIONS

- Show the cities/areas where SEEABLE operates.
- Use map, city imagery, billboard scenes or animated location transitions.
- Locations should feel like part of the story, not a basic bullet list.
- Prioritize visual clarity and easy scanning.

05 — OUR WORK / BILLBOARD SHOWCASE

- Large real billboard photographs.
- Full-width or large editorial-style image compositions.
- Minimal captions such as location, format or campaign.
- Use smooth image reveals, horizontal movement or scroll-based transitions where appropriate.

06 — WHY SEEABLE

- Communicate key strengths with minimal text.
- Prime locations.
- High visibility.
- Strategic placement.
- Audience reach.
- Professional execution.
- Use visual storytelling rather than five generic icon cards.

07 — FINAL CTA / CONTACT

- Strong final billboard or city scene.
- Closing statement such as 'READY TO BE SEEN?'
- Clear Contact / Enquire CTA.
- Phone, WhatsApp and email.
- Keep the final section clean and memorable.

4. Visual Language

Element	Requirement
Primary Visual	Realistic SEEABLE HOARDINGS billboard
Typography	Bold, modern, oversized headlines with restrained body text
Layout	Editorial, cinematic and asymmetric where useful
Imagery	Billboards, roads, cities, buildings, campaigns and real locations
Spacing	Generous whitespace and strong visual hierarchy
Navigation	Minimal, clean and always easy to understand
Cards	Use sparingly; avoid repetitive card-grid layouts
Motion	Smooth scroll, parallax, image reveals and subtle transitions
CTA	Few, clear and visually prominent actions
Overall Feel	Premium outdoor advertising / creative studio

5. Motion & Interaction Requirements

- Smooth scrolling between sections.
- Hero billboard should have subtle cinematic movement.
- Use scroll-linked transitions where they improve storytelling.
- Images can reveal, scale or move subtly as they enter the viewport.
- Text can animate in with restrained fade/slide effects.
- Hover states should feel premium and responsive.
- Avoid excessive animations, bouncing elements or distracting effects.
- Animations must remain smooth on mobile and lower-powered devices.
- Respect reduced-motion accessibility preferences.

6. Responsive Requirements

- Desktop: immersive billboard composition with large visual treatment.
- Tablet: preserve the visual hierarchy while reducing animation complexity if needed.
- Mobile: billboard remains the primary visual; typography and CTA must remain clear.
- No horizontal overflow.
- Images must crop intelligently across screen sizes.
- Navigation must convert cleanly to a mobile menu.
- Touch interactions must be comfortable and accessible.

7. What to Avoid

- Generic corporate website layouts.
- SaaS-style dashboards.
- Excessive rounded cards.
- Huge amounts of text.
- Stock-photo-heavy design with no brand identity.
- Unnecessary gradients or decorative elements.
- Too many buttons.
- Overly complicated navigation.
- Animation for the sake of animation.

8. Design Principle

ONE BILLBOARD. ONE BRAND. ONE EXPERIENCE.

The website should make the visitor remember SEEABLE HOARDINGS through a strong physical advertising visual and a smooth digital experience. Every section should support the story of visibility, location and brand impact.

9. Development Priority

- Build the billboard hero and core visual identity first.
- Establish typography, spacing and navigation.
- Build section-to-section transitions.
- Add real billboard/company imagery.
- Add responsive behavior.
- Polish motion, hover states and performance.
- Only then add secondary integrations such as analytics and contact backend.
